EIGHTH BI-MONTHLY PROGRESS REPORT
UNIVERSITY OF ALASKA
ERTS PROJECT 110-11
December 2, 1973

A. TITLE OF INVESTIGATION: ERTS-A Data as a Teaching and Research
Tool in the Department of Geology

B. PRINCIPAL INVESTIGATOR: Donald Grybeck UN 602

C. PROBLEMS IMPEDING INVESTIGATION: None

D. PROGRESS REPORT:

(a) Accomplishments during reporting period: The ERTS-A
material continues to be used extensively in teaching
Geology courses on both the graduate and undergraduate
level. In particular, this semester it is being used in a
term project in the graduate "Geology of Alaska" course
to test its applicability to:

- (1) shows elements of geology already defined on exist-
ing geologic mapping in Alaska
- (2) define structural and petrologic elements not
previously mapped

Color mosaics of selected portions of the state are being
used as the base to plot this geology, however black and
white prints are also used in conjunction with them to
insure collection of as much information as possible.

The preparation of the mosaic of Alaska is now underway
again. A "mock-up" of all available material is now
being prepared on 1:1,000,000 maps to test the coverage
and to insure that the best prints are used.

About 100 new 35mm slides of ERTS-A prints in both black
and white and color were added to the collection.

(b) Plans for next reporting period: The flood of prints which
is now arriving from the last data request covering the
Summer of 1973 are being filed and plotted.

The preparation of the ERTS mosaic will also continue and
should be in its final stages of completion at the end of
the next reporting period.

And the ERTS material will continue to be used by faculty
in teaching and research, by graduate students and under-
graduates and by the public.

E. SIGNIFICANT RESULTS: None

F. PUBLICATIONS: None

G. RECOMMENDATIONS: None

H. REVISED STANDING ORDERS: None (and Standing Order terminated
30 June, 1973)

I. ERTS IMAGE DESCRIPTOR FORM: None

J. DATA REQUESTS: None - and no more contemplated for this
project.
